Voodoo To You

This latest version of the '32 Roadster peaked our interest at Cruzin HQ due to it being billed as only true ALL kevlar/carbon fiber hot rod body on the market.

Voodoo 32R was unveiled during the Grand National Roadster Show and is available for Australian buyers. The chassis is unique to the body and cannot be matched to any other commercially available body (steel or 'glass) and similarly, the body will not fit any commercially available conventional '32 chassis. Interested Ausies with an eye for the exotic can check out their website at www.voodoohotrods.com but will need to be quick, as only 12 units will be offered this year.
